

CHILL Talent Office – Build Innovative Technology – Internship via CHILL

Build Innovative Technology – Engineering Internship via CHILL

Are you a technical student and want to work on innovative projects in R&D, production, or even defense-related applications? Then an internship via CHILL on the Chemelot Campus is an excellent choice.

Chemelot is a leading chemical and technology campus, home to more than 200 companies working on process optimization, product development, and R&D. While the core focus of the campus is chemistry and materials, these companies also have extensive technical departments such as engineering, maintenance, and innovation projects—perfect for students who want to apply their technical knowledge in practice.

CHILL helps you find the right match within this network.

What will you do?

- Contribute to technical and innovative projects
- Support R&D departments
- Design, test, and improve systems
- Work on practical engineering challenges

Who are we looking for?

You are pursuing an MBO, HBO, or WO (Bachelor/Master) degree, such as:

- Mechanical Engineering
- Automotive Engineering
- Electrical Engineering
- General Engineering Programs

Important to know:

- Start: from September
- Internships available in Dutch and English
- No voluntary internships

If you want to know more about this internship or are interested, please contact Keanne.panis@chill.nu
