

CHILL Talent Office – Internship & graduation

Job Description

Are you looking for a fun and educational internship? Open your future and step into the world of Chemelot! With more than 150 different companies, large and small, and the presence of the Brightlands Chemelot Campus, you have the best internship in the region here! There is no better place to start your career than at Chemelot.

You can make full use of your qualities here and you continue to invest in yourself through training, courses or education. But you also learn continuously in practice, for example by actively participating in various projects. Working and learning go hand in hand here and that will remain the case throughout your career. Every year the eyes of many upcoming talents are opened at Chemelot. Through internships and apprenticeships you will become acquainted with the unique environment of chemical companies. From startup to multinational; here you have every opportunity to discover what suits you best. There is also plenty of room for development in terms of width. You get to know the practice as you work.

Learning in practice

Chemelot also has to deal with an aging population. Many employees will retire in the coming years, which means a continuous flow of new vacancies. In addition, many senior employees walk around here. Seasoned professionals with decades of practical experience. You can learn so much from that. Knowledge that you will not find in any book.

Personal growth

The choice is yours: do you go into depth and become the best in your field? Or is your ambition ultimately more about a management position? One thing is certain: at Chemelot you also experience great development as a person. The international environment, the different companies, all the disciplines that come together here, the social impact (safety first) of everything you do. You also grow here as a person. Good for your CV Wherever you end up, a job at Chemelot always looks good on your CV. If you do well here, it says something about you. Someone who stands so firmly on his feet is welcome everywhere.

Your challenge

What are you going to do? An internship assignment is not just a project, but you are also really part of a team where you will gain experience in a wide range of disciplines, processes and various applications within your field. In addition to professional training, you also work on your personal skills. As a student you can follow free training at CHILL within the YOU 360 program. Together in a team or independently, you work on a problem/project or assignment with which you deliver added value to the organization.
