

CHILL Talent Office – Work Towards a Sustainable Future – LCA Internship via CHILL

Work Towards a Sustainable Future – LCA Internship via CHILL

Do you want to contribute to a more sustainable world and work on concrete sustainability challenges? Then this internship via CHILL on the Chemelot Campus is perfect for you.

Chemelot is a leading hub for chemical production and innovation, where companies actively focus on sustainability, circularity, and environmentally friendly processes. Within these companies, there are teams dedicated to Life Cycle Analysis (LCA), environmental management, and sustainability strategies—making it an ideal environment for students with a technical background and an interest in sustainability.

CHILL helps you find the right internship within this network.

What will you do?

- Conduct Life Cycle Analyses (LCA)
- Work with LCA software and data
- Support sustainability projects
- Analyze the environmental impact of processes and products

Who are we looking for?

You have a technical background and are pursuing an MBO, HBO, or WO (Bachelor/Master) degree, such as:

- Environmental Sciences
- Chemical Engineering

Important to know:

- Start: from September
- Internships available in Dutch and English
- No voluntary internships

If you want to know more about this internship or are interested, please contact Keanne.panis@chill.nu
